

Donald MacDonald MSc Erg, CCPE
Manager/Sr. Ergonomist

Donald joined the EWI Works Calgary office in the fall of 2002. Donald's education includes a Bachelor's degree in Kinesiology from Dalhousie University in Nova Scotia, followed by a Master's degree in Ergonomics from Loughborough University in the United Kingdom.

Prior to completing his Masters and working for EWI Works, Donald was employed by the Nova Scotia Department of Education – Rehabilitation Programs and Services. Donald worked as part of a multidisciplinary team, providing physical accommodations to students with disabilities to allow them to attend post-secondary education.

The focus of Donald's work is physical ergonomics, in both office and industrial environments. Clients include large and small, public and private organizations. Donald provides in-house consulting and project management to a large municipality with workers in a variety of occupations. Donald has experience in the following sectors; health care, power distribution, transportation, emergency medical services and a variety of office settings.

In addition to completing ergonomics assessments in a variety of settings, Donald continues to be involved in the development and delivery of customized training to clients, and teaching Ergonomics at the university level.

Donald's professional memberships include member status with the Association of Canadian Ergonomists and the Canadian Society of Safety Engineers. Donald holds the Canadian Certified Professional Ergonomist designation (CCPE) with the Canadian College for the Certification of Canadian Ergonomists.
