

EWI WORKS

Erin Walkom, M.Sc. Erg, AE

Erin received a Bachelor's degree in Kinesiology (Ergonomics Coop Option) from the University of Waterloo in 2004. As a coop student, she worked as a Student Ergonomist with the City of Toronto, Ontario Power Generation, General Motors and the Legislative Assembly of Ontario. Prior to her post-graduate education, Erin worked as a Researcher with the Ontario Ministry of Labour to examine the provincial jurisdictional differences in occupational health and safety legislation in Canada.

As part of her Master of Science degree in Ergonomics from Loughborough University in England. Erin completed her thesis that involved an audit of EPCOR Utilities Inc.'s Organizational Ergonomics Program. This four month project involved a review of the existing structure of the program and the development, feasibility analysis and recommendation of continuous improvement initiatives.

Erin joined EWI Works in 2005 as an Ergonomics Consultant where she was involved in a large-scale job demands analysis project with the Capital Health Authority in Alberta, involving the completion of approximately 140 job demands analysis across various categories, including nursing, industrial and administrative. She also played an important role in Capital Health's Patient Handling training program, including the development of an interactive CD version of the training.

Other projects include industrial and office environments in the private and public sectors. Office projects have included preventative and reactive ergonomic assessments, training development and presentation, program development and design reviews of furniture and equipment.

Industrial projects have included individual and group assessments, training and education and consultation in power generation and distribution, and manufacturing, healthcare industries. Erin has competently utilized a number of industrial assessment and analysis tools throughout her projects.

Erin professional memberships include member status with the Association of Canadian Ergonomists and the Canadian Society of Safety Engineers. Erin also received certification with the Canadian College for the Certification of Professional Ergonomists, gaining CCPE status.
